

BINARY TREE®

Powering Enterprise Transformations®

Manage your Notes archive migration without frustrating restrictions with Notes Archive Migrator CMT.

NOTES ARCHIVE MIGRATOR CMT

Easily Migrate Your Notes Archives

As key component of Notes Migrator | CMT, Notes Archive Migrator | CMT helps retain valuable archives after a migration. It discovers, chooses, and replicates Notes mail archives that users have saved, locally. It works independently from a Notes client, so it's flexible enough for users across your organization. There are no limits to the number of local archives you can migrate, no restrictions by operating system, and you can choose from a wide range of source and target destinations. Because it supports multi-user clients, Notes Archive Migrator | CMT solves the most pressing challenges with migrating critical archives. It also first replicates the archives in a central location to get ready to move them to Exchange or archive mailboxes. This means that there's less chance of your data getting corrupted or lost. And its user-friendly interface makes for a smooth, efficient migration that fits the schedule of your users.

Migrate

Move Notes archive data

— Migrate archives from Domino 7, 8.5 or 9 to Exchange or Exchange Online in Office 365

— Migrate to mailboxes, local archives and Exchange archive mailboxes

Automate

Save time and manage effectively

— Fast and efficient migration

— Users avoid manual archive handling to avoid impacting productivity

— Automate archive migration to quickly find historical records when the migration is complete

Flexible

Avoid restrictions

— No operating system restrictions

— Scalable for large enterprise migrations

— No limits to how many mailboxes are migrated
