What's New

Active Directory Pro 19.4 includes several bug fixes and enhancements. A full list of changes for this release is presented below.

The release version number represents the year and month of the release (19.4). The last GA release of Active Directory Pro was 18.12 released in December 2018 and before that was 18.9 released in September 2018.

Version 19.4 Release Notes

- An issue where an error occurred during Printer ReACL due to a large number of printers has been resolved. (34493)
- An issue in the user interface filters causing actions to run on objects not selected has been addressed. (62533)
- An issue where an error occurred in the user interface when using Select All, but running an Action that only can be run on one object, has been resolved. (62731)
- Changes to reduce agent registration deadlocks have been implemented. (63594)
- Active Directory Pro agent registration now supports TLS 1.2 only connections. (63611)
- The ability to configure a file blacklist for Device ReACL using regular expressions has been added. This is manageable and configurable through SQL. (63876)
