

BINARY TREE®

Powering Enterprise Transformations®

Move your Domino application content to SharePoint or other modern applications

MIGRATOR PRO FOR DOMINO

Migrate Notes Application Data to SharePoint, Office 365, and Other Enterprise Repositories

Migrator Pro for Domino is an automated solution for migrating content from your legacy Notes and Domino applications to the destinations of your choice. Migrator Pro for Domino provides you with a flexible, scalable, and high-fidelity migration of your content from any Domino database. Quickly migrate your content to Microsoft SharePoint, SharePoint Online, and to enterprise content repositories and SaaS applications that import XML, CSVs, and SQL.

Migrate

Move Domino application content

- Migrate content from document libraries, discussion databases, TeamRooms, and Quickr applications to default or custom SharePoint lists, or convert content to PDFs and Microsoft Word files

- Migrate Domino content including rich text, attachments, and URL links, as well as application and document level security, to Microsoft SharePoint

Automate

Save time and execute effectively

- Comprehensive automation, including file export types and target environment choices

- Intelligent design ensures data fidelity from start to finish

- Scalable to fit organizations of all sizes – even the largest enterprises

Manage

Gain insight and maintain oversight

- Simple user interface to schedule, execute, and manage the entire migration – avoid late nights and weekend projects

- Detailed logging for easily managing the project

- Powerful reporting helps you keep your management informed and updated
